THE ART OF BEAUTIFUL SPACES

Interior shown in Tranquil Tundra

## Inspired Colors

Distinctive panels in sophisticated colors, for today's modern interiors, to fit any home or corporate setting.

Obsidian Shadow

Silver Starlight

Umber Odyssey

Tranquil Tundra

Sienna Sunrise

### Obsidian Shadow

Inspired by glassy lava flows, this rich black color is reminiscent of Wenge.

### Silver Starlight

Taking a cue from reclaimed barn wood, Silver Starlight provides a patina and coziness to any interior it touches.

### Umber Odyssey

Our most popular russet color, Umber Odyssey lends a contemporary hue to complement twenty-first century design.

### Tranquil Tundra

The muted tones of the far north are the inspiration for this soft, clear and inviting wall treatment.

### Sienna Sunrise

Honey chroma warms any space that Sienna Sunrise touches. Candlelight and craftsmanship complement this interior accent.

Silver Starlight  
with Buck Sawn detail

All colors are available with optional Buck Sawn detail. Contact your sales associate for more information.

Innova colors are manufactured on a 1/4" MDF panel.

## Design Freedom

Rich colors combine to create ambience, warmth and calm. The Innova palette complements any decor and style.

## Premium Veneers

States manufactures Innova using only premium hardwood veneers. Real wood paneling offers the discerning buyer subtle

variations of grain and color. Real wood veneers age, growing naturally warmer and richer with the passage of time.

All States Industries paneling is made from natural wood veneers. States finished wall panels feature NOVA® ultraviolet cured topcoats.

States wall panels have no added formaldehyde. Most panels can be ordered FSC® certified.

## INSTALLATION TIPS

Detailed installation instructions are available from your panel supplier. The following tips are specific to natural wood panels and should be observed in addition to general installation instructions.

### **Prearrange Your Panels**

States panels are made with natural wood veneers. Each panel is a distinctive blend of color and grain varia-

tions. Prior to installation, you should stand the panels upright around the room to achieve the most pleasing effect. Note that there is a top and bottom to each panel. Once you have determined placement, number the panels to avoid confusion.

### **Acclimate New Panels**

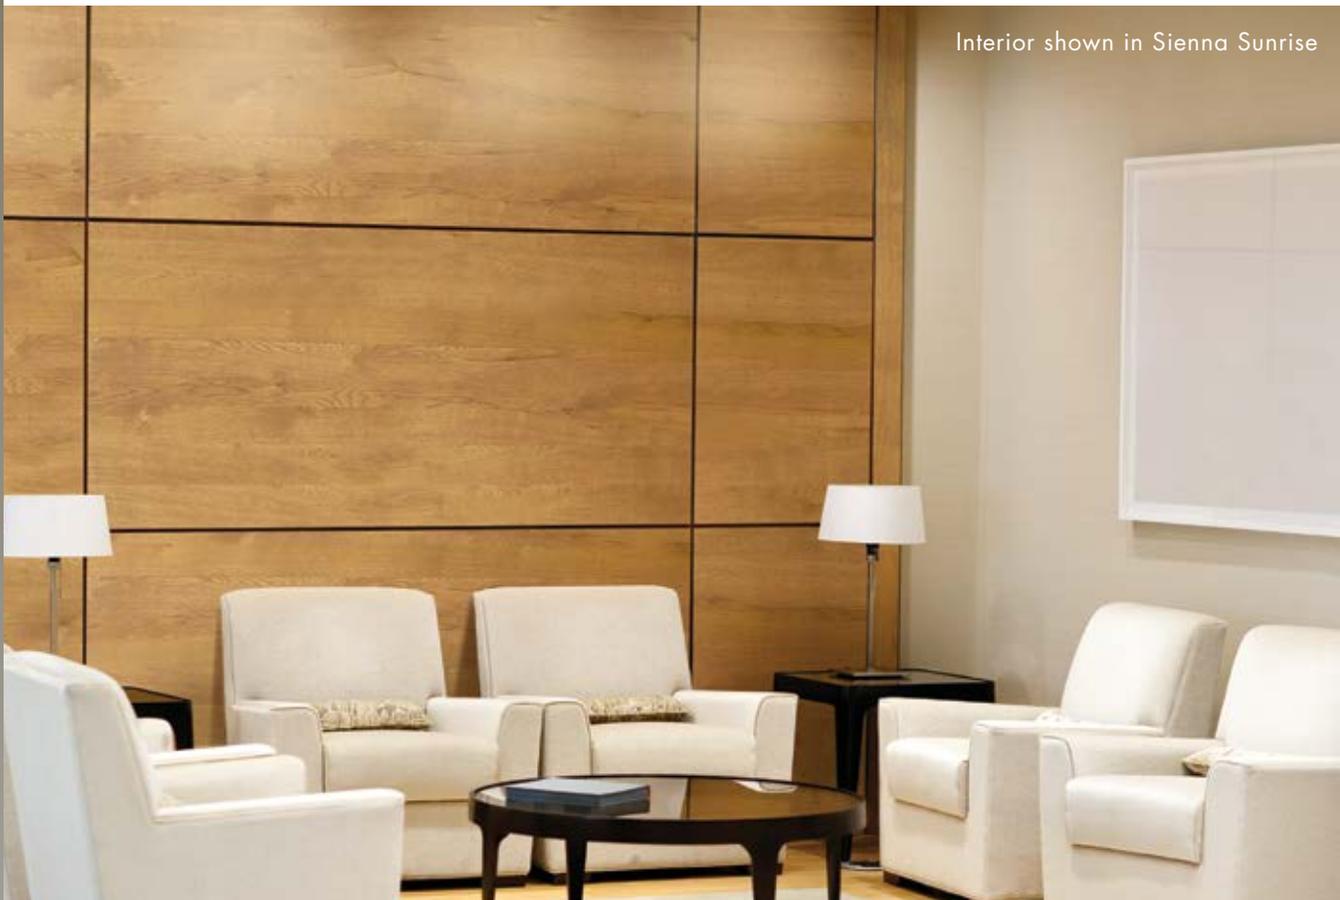

Panels should be stored in the room where they will be installed, at normal temperature for a period

of 24 hours. Separate the panels with a spacer to allow air to circulate around them. This procedure allows the wood to adjust to the humidity and temperature, and prevents any shrinkage or expansion after installation.

### **Allow Adequate Clearance**

There is a tendency to fit panels as tightly as possible. While this is understandable, it is not a

good practice. Butt panels snugly along their sides, but allow a minimum of 1/8" space at the top and bottom. This space will be covered by moulding, and will not be visible. Spacing allows the panel and the wall to expand and contract with changes in temperature and humidity.
